Francis - Attached is a request for inspection services for the Basic Tool Kit Project. Keep in mind that there are 2 suppliers, AMS and Von POK & Chang. AMS will be making 15 piece and 16 piece sets. Von Pok will make a slightly different 15 piece version (these samples were shown to you in NY.)

Last night I expedited 3 sets to you: the AMS sets are final, The V.P. & Chang will be modified with tighter "LUG" wells and will have the same printing as AMS sets. I should have this sample to you by Friday or Monday next. Please rush this through, as production has already begun. Note: production schedules may get better. Thank You. Vince
